This is the famous weapon of the superhero Batman, Batarang, based on the movie "The dark knight"!

Screenshot of the movie.

Quote:A batarang is a roughly bat-shaped throwing weapon used by the DC Comics superhero Batman. The name is a portmanteau of bat and boomerang, and was originally spelled baterang. Although they are named after boomerangs, batarangs have become more like shuriken in recent interpretations. They have since become a staple of Batman's arsenal, appearing in every major Batman television and movie adaptation to date. Recent interpretations of the Dark Knight finds additional motivation to use the batarang as a ranged attack (alternative to firearms, which he rejects outright due to the circumstances of his parents' murder) and is used primarily to knock guns out of an assailant's hand.

Here are the screenshots of the 3D printed model!
