Hi

I am trying to generate Java classes for given wsdl at <http://api.shapeways.com/v1/wsdl.php>
However, the compilation tools are giving me syntax errors with the wsdl.
Details below

```
~/jboss/bin/wsconsume.sh -k http://api.shapeways.com/v1/wsdl.php  
Could not find log4j.xml configuration, logging to console.
```

```
Loading FrontEnd jaxws ...  
Loading DataBinding jaxb ...  
wsdl2java -compile -exsh false -d /home/dasher/Sunglass/temp/output -verbose -classpath  
/home/dasher/Sunglass/temp/output -allowElementReferences  
http://api.shapeways.com/v1/wsdl.php  
wsdl2java - Apache CXF 2.4.1
```

Failed to invoke WSDLToJava

```
org.apache.cxf.tools.common.ToolException: org.apache.cxf.wsdl11.WSDLRuntimeException:  
Fail to create wsdl definition from : http://api.shapeways.com/v1/wsdl.php  
Caused by : WSDLException (at /definitions/message[1]/part[2]): faultCode=INVALID_WSDL:  
Encountered illegal extension attribute 'nillable'. Extension attributes must be in a namespace  
other than WSDL's.
```
