I am working on a project for a client that requires creating a highly contoured swim fin design. My client is a world class professional body boarder and has some pretty detailed requirements that I have been able to get close to in Solidworks. Now I need someone that is good with detailed surfaces to clean it up, using my part as reference geometry.

Please e mail me with some samples of your work. If it looks like you can handle the job I will e mail you a file to review for quote. I need this asap, so please move quickly if you are interested.

Thanks,

Lyman Bishop
