Grab yourself a copy of Accutrans3D or MeshLab and use their scaling tools. NetFabb can also be used for scaling, but it doesn't support .dae files, though it can be an invaluable tool for measuring & repairing models.

Hi,

You can read more about our tutorials over here, and you will also find a tutorial about Meshlab.

<http://www.shapeways.com/tutorials/>

If you have got any other questions, you can sent them to service@shapeways.com as well and we will help you out with this.

Good luck!
