I'm looking for someone to design a case for a small LCD display (see pic). The display is a two-board stack that's roughly 2.5x3.0x1.0" overall. I'm imagining a two-piece design that would snap or screw together. There are four holes on the lower board available for mounting purposes. I can provide detailed dimensions of the assembly (including some in DXF). I haven't thought much about the material, but probably some kind of plastic would be fine.

I don't have much of a budget for this (it's just a little hobby project), but I'm also not sure I want to dive into learning new software and trying to design it myself.

- Jay

If you could send the DXF and detailed info I'll give it a go and see if you like it...

Are you after a particular style, or just a box?

I would also like to give it a shot

So if there's still a place you can send me the dxf over as well.
