Lo everybody.

Having some trouble with uploading a model to shapeways. I seem to be getting volume measurements way higher in shapeways than I do in netfabb, and netfabb hasn't really given me trouble before. Maybe some changes in shapeways volume assessment system caused this?

Or their policies have changed?

Any assistance would be appreciated guys. Thanks

Edit: figured out shapeways indicates volume & price for maximum volume entered in co-creator.
my bad
