Hello all! I collect and restore old radios (mainly 1930s to 1950s), and could use 3D printing to reproduce objects such as escutcheons, or to make parts which could then be used to make molds. Some old parts were made of an early plastic know as Tenite which shrinks and distorts with age.

Welcome!

Tell us more about you, you can look here for introduction guidelines.

I'm especially interested in where you are locate, as I have a few old radios, and have a way of getting more if your interested.
