When trying to edit the template for my co creator, if I add too many options I can't scroll down to access the "Save Template Details" button. Mouse scroll moves the greyed out background, not the template I'm working with, and I don't see another scrolling option.

I'm using Windows 7, Firefox 10.0.2

That would definitely not be good. I saw something like this a while ago, I think I was updating a model and had the same problem, but it has since been fixed. Add your problem to Uservoice so that it gets added to the Devs Docket.
