Hi all,

I am in need of a good 3D designer to help me model a little piece of office supplies (plastic) with smooth shapes. Drawings of the object are available. The project is on a short notice, so send me a PM if you can help me for a reasonable fee.

Regards,  
Martijn

Hi, I'm a beginner 3d-modeler and can do basic stuff. Depending on the complexity of the item, I might be able to do it. Please show the diagram if you'd like me to asses it. Check out the work at my shop and you'll see what level modeler I am. I would charge a very low price, but I've even done some projects free.

Thanks for your replies all, I was actually surprised by the large numbers of offers I got. I found my designer so no more offers needed at the moment!
