I have a one-piece plastic model I need. I have virtual pics of the design but in order to have it made by a 3D printer, do I need to have a CAD file made first?

Thanks

Pat

That is correct Pat. I can model it up for you so that you can submit it to Shapeways for build. What are the overall measurements? I will PM you with a price for me to model it up.

Hi!

I'm searching for a 3D modeller to do military figures and tanks at a reasonable price for sending them later the shapeways to print. Just drop me a line with an answer if you're interested or not. cheers!

Hi,

I need some one to make a 3d cad for a case built for development boards.

Please let me know the price at rahul19dj@gmail.com

Hi CADNinja,

We are looking for a CAD design guru for a unique project.

Looking to have a full design created- so we can take to our CNC machine and make the parts.

PM me and we can discuss via email.

thanks!

Can you work from some photographs of my prototype? I can also provide 2d drawings. The object is about 2" by 1/2", however the dimensions are less important than the arrangement of the holes and slots. I want to 3d print the final product with Shapeways.

Sure thing Allen

I will email you and you can reply with the photos and 2d drawings if those exist

Thanks

Hi, friends

Nice to meet you !

I can make one precision 3D model file at Solidworks for you . But I need the big size first . Just feel free to contact me , my MSN email :
richardbovelt@live.cn

I appreciate you can provide more detail info about your this model.

Thanks and wait for your reply

Yours sincerely

Richard
