Just another little thing I've been making, a Victorian Ivy cast iron style 1:76 OO scale bench set. As yet untested, but it should print ok in FUD.

The set on a frame;

5 section circular tree bench - suits scale trees upto 7mm diameter;

6 section circular tree bench - suits scale trees upto 10mm diameter;

3 seater bench;

2 seater bench;

Similar styled railings and gates to follow.

I used to work for an outdoor furnishings manufacturer. They are fairly popular, and you can view their 2D specs online. I've actually been thinking about doing a scale trash receptacle to take to them.
