Hey all!

I am sad to say that our big detail machine is going offline. The new maximum bounding box for Transparent, Black, and White Detail is now 25x25x20cm.

If you need bigger models, take a look at White Strong & Flexible, or Black Strong & Flexible. Both those materials have larger bounding boxes and is the best choice in plastics for larger models (also cheaper!).

Let me know if you have any questions please!

Thanks,
Nancy
