Hello everyone. My name is Justin and I'm from Texas. I'm not a 3D artist by any means but find this medium to be very useful, efficient, and interesting. I look forward to learning more about all of this and meeting some cool people and hopefully working with some of you.

Thanks for the warm welcome guys. I live in central Texas, pretty much in the country, about 30 minutes drive away from the geographical center of the state. I work in the film industry and I'm a single father. I could ramble on about lots of useless facts about myself but I don't want to bore anyone.

What software do you use, or are you looking to use? What experience do you have? What would you like to design?

You won't bore us, we love to know about our fellow community members.
