They call us "Wilmywood" since we make a few movies here, and since I do props and small special effects models, I thought this site would be great to try some stuff out. I mainly use Sketchup for my 3D modeling. I'm used to building stuff by hand and this 3D thing is still a little new. If anyone has any caveats to consider with Sketchup, please don't hesitate to let me know. See ya around the board.

Mark

Welcome 8-perf

Love to seem of your models in our gallery!

Cheers,

Ralph

I thought your gallery was for stuff that was designed and printed here. Feel free to check out my website - www.8-perf.com - until I get proficient enough in your process to post new stuff.
