---

Both me and a friend tried to download the shapeways add-in 64 bit version, to install into solidworks, 64 bit version. With both of us (im 2011 he's 2012) it didnt work. I installed it. I ran the reg as administrator, i opened solidworks, nothing in the add-ins besides 3 default ones.

I know it worked last year when i was on 2010 student edition, but that liscense expired. Now im on 2011 student edition, and it wont work.

I cant save it as anything besides a SldPrt.

If theres no fix, Can i send someone the file and have them save it as the correct file, so I can upload it, and print it?
