Hi Shapeways fans,

Geared 1x1x4 is a four-layer twisty puzzle. The four layers are held together by planetary chevron gears. The object is to rotate the layers, scramble the puzzle and then get it back to its original state. That is much harder than it looks. The gearing ratio's are 35-10-55 and 35-21-77.

Watch the YouTube video.

Buy the puzzle at my Shapeways Shop.
