With an incredible succes, I've attended yesterday at "Kunst in het Volkspark" an amazing event where art and design are mixed each other, in Enschede - The Netherlands, with more than 30.000 visitors.

The most beautiful thing was to see the smiling and happy face of very enthusiastic women watching my designs, asking me information about this technology and than say: "... I love it, I want it!"

A very special thanks to these special women that love this new technology dressed with elegance.

Dario Scapitta Design.
