Polyhedral Sculpture #26 - Pendant
<http://shpws.me/8CnM>

Shows the duality between Dodecahedron and Icosahedron.

Based upon knowledge I accumulated during the 1980's while exploring hands-on "the extraordinary spatial diversity that emanates from the sublime order and elegant simplicity that is exemplified by the subject of polyhedra." (Quote from the Preface to the wonderful book POLYHEDRA PRIMER by Peter Pearce and Susan Pearce)
