I've uploaded a picture of 240x240 pix, it turned out stretched.

Mhh...

The shop logo is a uniform square (30x30 px), but the shop-logo holder is rectangular...  
D'oh! ^^

Scale your 240x240 px image to 170 x 130 px (stretched !) ...

Hi, is there any news of fixing the shop logo ? If it takes time, can someone help switch my logo back to "Shapeways shop" ?

Hi Plain,

This will be fixed with today's release, so check by the end of the day and it should be back to normal size!

Hi, yes I see the shop logo is fixed. It looks pretty good. Thank you. Just got two more questions: What picture size should we use if we want to change the logo ? Do "designer" page picture and forum picture go in sync with the shop logo? as I saw, these pictures did not change.

What picture size should we use if we want to change the logo ?  
I've updated my page with a 30x30 px variant of my Av'.

Do "designer" page picture and forum picture go in sync with the shop logo? as I saw, these pictures did not change.  
Nope.  
But IIRC, you can change your designer pic in the Account Settings  
( <http://www.shapeways.com/account> ).

My pic is 240 x 240 pix, same pic is used in all my social sites. Maybe the logo pic need to be just square, anyway, I wish some authority can include this info in tutorial.
