I am planning to model an iPod touch case but would like to know what the most common iPod touch model is out there, so could all people owning an iPod touch please answer the poll at the top of this page.

Many Thanks

P.S I am planning to convert one of my current iPhone cases to an iPod touch case, would anyone know how to do this without completely starting from scratch, maybe somehow 'moulding' the iPhone case the the curved geometry if the iPod touches using some software? Thanks again
